Subject: After-School Activities Run

The Board of Education will provide transportation from school to home for students in grades 5 through 12 involved in regularly scheduled after-school extracurricular activities under the following conditions:

1. The average daily ridership from any school building to be served must be at least twenty (20) students. Averages will be determined on a regular basis. Only students who are engaged in regularly scheduled after school extracurricular activities or academic support will be included in calculating average daily ridership.
2. Activity buses will be scheduled to depart from any school served between forty (40) and fifty (50) minutes after the standard dismissal time for such school.
3. The Director of Transportation shall have the discretion to establish appropriate stops for discharging pupils using an activity bus, taking into consideration the safety, efficiency, economy, and convenience of the service to be provided. In the case of any activity bus provided for a non-public school, students shall be returned and discharged at the centralized pick-up point.
4. Students who are not engaged in a regular after-school extracurricular activity or academic support may use an activities bus provided there is space available.
