Subject: Structural Safety Inspections

It shall be the duty of the Board of Education to ensure that each facility owned by the District, which is used for instructional purposes shall be inspected annually for structural deficiencies.

Every annual structural safety inspection shall be a visual inspection, which will examine the structural elements of each building, and may also include inspection of the building systems such as heating, plumbing, and electrical systems.

If a visual inspection results in a determination that a building may have a structural deficiency, then the building shall be inspected by a licensed architect or a licensed professional engineer.

The annual structural safety inspection shall be made prior to June 13th of every year, and reports of the inspection shall be made available to the public.

Educational Law Sections 409 (d) and 3602 (6) (d)
