Subject: Transportation to School Sponsored Events

The Superintendent may approve the use of Williamson Central School District buses to transport student spectators to away school approved activities and events. The buses will be provided only to students of the particular school (or schools) involved and it will be the responsibility of the building principal(s) to provide appropriate supervision.

If the District provides transportation for students participating in inter-scholastic competition or other district sponsored educational activities, students will not be authorized to use any other means of transportation when participating in these events, unless the principal or his/her designee authorizes such alternate transportation. The principal will require written application prior to approval.

Adopted: Board of Education
1987
