**Subject: Instructional Goals for Computer Education**

Continuing advances in computer technology are bringing about many changes within our society that have an increasing impact on the way we obtain, process, evaluate, and use information. District students should receive the benefits available through computer education that will assist them in accomplishing the educational goals of the District. Therefore, the District is committed to:

- (a) Providing appropriate instruction in computer literacy and computer-assisted instruction through the establishment and use of computers in each school as funds permit;
- (b) Providing instructional personnel with appropriate inservice in computer literacy and computer-assisted instruction that will assist them in reaching educational goals approved by the Board.

The Board will make an effort to ensure that students have an opportunity to:

- (a) Gain an understanding of the applications of computers in society;
- (b) Gain an understanding of the social implications of computer applications to society;
- (c) Develop skills in the use of computers as learning tools;
- (d) Develop vocational skills that can lead to further training or employment opportunities.

Adopted: Board of Education  
1987

Approved: Board of Education
